memory oblivion box

Blast form the past, a MTG clone game which is surprising challanging and deep. Dont expect much from graphics as there the same from the orginal back on 98. It is different than a normal RTS like starcraft or what not, but it is a very fun game and I enjoy the ability to command my troops by voice command. Also graphics are excellent.. A must play. Awesome !!. This is an explosively creative puzzle game for VR. It is gorgeous, and original at every turn. The puzzles are all fun and well executed, save one that did take me out of the game. Though even with one puzzle that felt out of place, the game is still a gem. If your a fan of the sort of unique VR experiances, this is one to try. The game is only an hour or so long, but well worth your time.. This game is basicly like SPAZ but, the first iteration of it. This may be worth buying if you like flying a spaceship around, mining, and protecting the mothership. Though it is old and it should be a definet factor as to wanting to buy it or not.

It control well enough for its age, though the keyboard controls are odd.

I personally recomend the game but, it is not for everyone.. I realize this is just a PC port of the game for mobile devices, but I've never played it before so here are my thoughts:

TL:DR: Surprisingly fun, no micro transactions, narrated voice acting, decent port.

First Impression Gameplay: https://www.youtube.com/watch?v=jCFCXxEh_zM

[Based off the developer description. I expected this to be a broken mess with terrible translations and questionable gameplay. I was a bit surprised when the opening cinematic was not only proper English, but voice acted with proper English as well.](#)

[Gameplay is fairly simple: select which turrets go on your ship \(reminds me of gratuitous space battles\), and pilot your ship around as your turrets auto-fire on enemies. As enemies die, they drop crystals which can be spent on match specific upgrades. The end of each battle features a boss to be defeated within a certain time limit. There are 6 weapons to choose from, with two separate types \(physical and optic\). At the end of each match, you are awarded with crystals to be spend on ship/turret/skill upgrades.](#)

[A story does exist in this game \(something about crystals and super powers\), but it feels a bit forced and unnecessary. The main character is an attractive anime chick, so I guess that is a plus.](#)

[Anyways: the game is fun, the port works well, and the game kept me engaged.](#)

[Feels a bit steep at ~\\$5, but I've paid more for less. I'd recommend.](#)

[Oh. And as a bonus, I did not see any microtransation or pay to win shenanigans going on.. The game only takes about 30min to finish, was fun but needs more things to buy. Really, really, really, really.....oh sorry i feel asleep. It's boring. Not really fun either. In summary, if you want to sit around like you are on a business call at all times than this is the game for you. If you don't like simple user interface's that have no change in visuals, this is exactly the game for you. In general, this is the game for the type of person that, might stare at a blank canvas and say "THIS IS THE MOST BEAUTIFUL PIECE OF ART I HAVE EVER SEEN!", or you just enjoy doing nothing.. Very low-budget dungeon RPG. Don't worth it. Stay with Legend of Grimrock 1/2 and their mods. Even the classics Eye of the Beholder/Dungeon Master/Bloodwych are much better than this.. all dlc in this game are \u2665\u2665\u2665\u2665ing trash](#)

Brilliant product, very good design work on the coaches and in passenger view. Would advise to buy this. need more improv. this game sucks. Please do not remake this game.. very cool indie racing game. endless runner car game. I liked much. Good controls, nice cars, car payment system, lot of different gamemodes, ok graphics. Definitely worth of price. **Review for MORDHAU**

Mordhau is a first & third-person slasher inspired by games such as Chivalry Medieval Warfare. Also amazing character creation that lets you create multiple kinds of mercenaries to suit your play style. Mordhau has a variety of gamemode types: Team Deathmach, Skirmish, Frontline, Battle Royale and Horde. Developed by small studio (10 developers only).

9\10 highly recommended game

Thanks for reading!. Its the most leet mlg game out there and it's my childhood!. Over The Void is a platformer that flips the genre upside down. Instead of relying on well performed jumps, you're able to place a platform below you to catch you fall. This allows for levels you've never seen the like of before, with some pretty colors.

That being said, the game is far to easy. There's no limit to how many platforms you can place and one platform is basically a trampoline so you're just left rocketing off trying to get to the buttons as fast as you can, which isn't fast enough. They're most often very easy to find and get to, with just a matter of how long it takes to get there. There's also orbs to collect, but those too are often easy to find and get to.

The real challenge in this game is the physics. You move around just fine (albeit a little slow) but the way you interact with the world is pretty bad. Often buttons will turn green only to turn red when you walk away. The buttons will sound like they've been pressed when they haven't been. The buttons will not make any sounds when they do get pressed. What looks like rain plummets you to your death. Anything that move sends you awkwardly around.

Overall, a poor game.. underboob\10
